I recently designed a
10DOF Wing for
Adafruits Feather
boards and today I did
a redesign for the
ESP8266 board. The
original design works

well, but on this, I
completely rerouted
everything.

Give your Feather a sense of place, with an Ultimate GPS

FeatherWing. This FeatherWing plugs right into your Feather board and gives it a precise, sensitive, and low power GPS module for location identification anywhere in the world. As a bonus, the GPS can also keep track of time once it is synced with the satellites.
