- Counting Boards - A Counting Board in a Strasbourg Museum up. Author(s): Chris Weeks. Surfaces marked with lines were used for calculation with counters since antiquity and the early printed arithmetics commonly show illustrations of them being used. From Jakob Koebel's Rechenblechlin, Augsburg, 1514.

### Counting Boards - A Very Brief History of Counting Boards ...

The counting board is the precursor of the abacus, and the earliest known form of a counting device (excluding fingers and other very simple methods). Counting boards were made of stone or wood, and the counting was done on the board with beads, or pebbles etc. Not many boards survive because of the perishable materials used in their construction.
