For protection in harsh environments, use an EMI/RFI environmental backshell. Mil-Spec Compatible - 100% compatible with all M85049 military and commercial derivatives

M85049 EMI/RFI Non-Environmental Backshells | MILNEC

The terms EMI and RFI are often used interchangeably. EMI is actually any frequency of electrical noise, whereas RFI is a specific subset of electrical noise on the EMI spectrum. There are two types of EMI. Conducted EMI is unwanted high frequencies that ride on the AC wave form. Radiated EMI is similar to an unwanted radio broadcast being emitted from the power lines.
