"Airline Operations and Delay Management" fills a gap within the area of airline schedule planning by addressing the close relationships between network development, economic driving forces, schedule demands and operational complexity.

Airline Operations and Delay Management : Cheng Lung Wu ...

Flight delays are very costly and annoy passengers. Nevertheless today's flight schedulers have little information on delay risks and on typical disturbances when creating a schedule. Even so the schedule is the base for a punctual operation, punctuality aspects are barely considered in the scheduling phase.
