Finally, then, Greimas's contribution to our understanding of human nature is within the Kantian tradition of establishing a priori conditions of possibility for our cognition of the universe and our consequent ability to function in it. He gives us an account of the semiotic constraints whose interaction regulate our patterns of thought, communication, and action.

The semiotic square, also known as the Greimas square, is a tool used in structural analysis of the relationships between semiotic signs through the opposition of concepts, such as feminine-masculine or beautiful-ugly, and of extending the relevant ontology. The semiotic square, derived from Aristotle's logical square of opposition, was developed by Algirdas J. Greimas, a French-Lithuanian linguist and semiotician, who considered the semiotic square to be the elementary structure of meaning. Gre

December 6, 2016 • (9). A.J. Greimas' work has been an effort to analyse all forms of discourse. Greimas emphasizes the idea that language is an "assemblage of structures of signification" which implies that the language system cannot be "given" in advance but must be articulated as discourse (discourse, for Greimas, is ...

Apart from my inability to find a satisfying discussion of how we get from Greimas's world of texts and narratives to the world of collective entities, quasi-objects, and nature-culture discussed in Latour's most recent essays and his latest homily, *We have Never Been Modern*, my concern is that, in the form of a grid of pre-existing competences and roles, we are being provided a map and potentially a set of taxa which specify certain types of actors and narratives, and with this we are back ...

The Semiotic Turn - Stanford University

Greimas and the rationalist tradition of Continental linguistics and semiotics-assert in *Science as Cognitive Process* that "perhaps the major function of the brain is to model reality" (1984: 21). That is, the nature of cognition is to simplify experience. Such modeling is a mode of simplification that can be understood in many ways.

NARRATIVE STRUCTURES

Like the structural linguists that also inspire him, Greimas looks for what we might call the underlying grammar of narrative, "the semiolinguistic nature of the categories used in setting up these [narratological] models" (63); he wishes to find behind any "manifestation of narrativity" a "fundamental semantics and grammar" (65).

Introduction to Algirdas Greimas, Module on Plotting

The semiotic squares developed by Algirdas Julien Greimas, draw the distinction between two types of opposites: antithesis (where X and anti-X annihilate each other) and countermeasure (where X and counter-X push and pull against each other in the act of self-becoming).
