Alan Turing The Life Of

For other uses, see Turing (disambiguation). Alan Mathison Turing OBE FRS (/ 'tjʊərɪŋ /; 23 June 1912 – 7 June 1954) was an English mathematician, computer scientist, logician, cryptanalyst, philosopher, and theoretical biologist. Turing was highly influential in the development of theoretical computer science, providing a formalisation of the concepts of algorithm and computation with the Turing machine, which can be considered a model of a general-purpose computer.

mathematics, cryptanalysis, logic, philosophy, and mathematical biology and also to the new areas later named computer science, cognitive science, artificial intelligence, and artificial life.

Alan Turing | Biography, Facts, & Education | Britannica

Alan Mathison Turing was born on 23 June 1912, the second and last child (after his brother John) of Julius Mathison and Ethel Sara Turing. The unusual name of Turing placed him in a distinctive family tree of English gentry, far from rich but determinedly upper-middle-class in the peculiar sense of the English class system.

Alan Turing - a short biography

Alan Turing was an extraordinary man who crammed into a life of only 42 years the careers of mathematician, codebreaker, computer scientist and biologist. His codebreaking work at Bletchley Park was so significant it helped to shorten the Second World War, and with Tommy Flowers he built the first computer.

Alan Turing: The Life of a Genius: Turing, Dermot ...

The story of Alan Turing's life ends tragically. In 1952 he was prosecuted for homosexual acts. This was due to the Labouchere Amendment of 1885, which was an act that determined that "gross indecency" was a crime in the United Kingdom. As an alternative to prison, Turing was offered chemical castration, which he accepted.
