

## An Arc 164 Uhf Airborne Radio

Getting the books **an arc 164 uhf airborne radio** now is not type of inspiring means. You could not on your own going past books increase or library or borrowing from your friends to entre them. This is an definitely easy means to specifically get lead by on-line. This online declaration an arc 164 uhf airborne radio can be one of the options to accompany you later than having further time.

It will not waste your time. say you will me, the e-book will very ventilate you extra concern to read. Just invest little become old to contact this on-line publication **an arc 164 uhf airborne radio** as with ease as review them wherever you are now.

There aren't a lot of free Kindle books here because they aren't free for a very long period of time, though there are plenty of genres you can browse through. Look carefully on each download page and you can find when the free deal ends.

### An Arc 164 Uhf Airborne

The AN/ARC-164 is the standard avionics radio for the U.S. Air Force and U.S. Army. It provides the DoD and NATO standard anti-jam ultra-high frequency (UHF) voice communications in support of modern military operations. The latest AN/ARC-164 radios feature MIL-STD-1553B interfaces. Raytheon developed the RT-1614 to provide anti-jam UHF voice communications to an avionics

### AN/ARC-164 UHF Airborne Radio - CellMail.com

The AN/ARC-164 is an aircraft station (also: aircraft radio station) that operates in the aeronautical mobile (OR) service / B band (NATO). It might be found on B-52G/H, B-1B, C/EC/RC-26D, KC-135, C-23, C-130, C-141, F-15, A-10, F-16, UH-1D, CH-47, H-53, H-60 and S-3B aircraft.

### AN/ARC-164 - Wikipedia

System Description Edit. The ARC-164 is a military UHF AM radio that operates between 225-399.975 MHz and transmits at 10 watts. It features a separate guard receiver for monitoring 243 MHz while simultaneously monitoring the active channel selected, an ECCM slice capable of storing multiple Word-of-Day patterns for Havequick operation, and can also serve as a channel selector and audio demodulator for separate UHF DF systems.
