See API 521 for information about appropriate ways of reducing pressure and restricting heat input. Atmospheric and low-pressure storage tanks covered in API 2000 and pressure vessels used for the transportation of products in bulk or shipping containers are not within the scope of this standard.

API Std 520, Part 1 - Techstreet

The latest revision to RP 520 Part 1 is intended to permit the backpressure for a conventional pressure relief valve to go up to but not exceed the allowable overpressure. For cases such as the fire case, and as shown in your examples, a backpressure over 10% is permissible.
