Biology, 9th Edition

Biology Is Based on an Understanding of Evolution When Peter Raven and George Johnson began work on Biology in 1982 they set out to write a text that presented biology the way they taught in their classrooms—as the product of evolution.

This text is very poorly written. It is unnecessarily obfuscating and jargon cluttered. If there are three terms with which to describe the exact same thing, Raven is sure to give you four.

There are much better
General Biology texts
out there which I had
to refer to because
Raven makes such a
muddle of things.
