Biology 34 Vertebrates Study Guide Answers Vertebrates - Animals with Backbones. Scientists classify animals into two categories depending on if the animal has a backbone or not. As you know, invertebrates are animals that do NOT have a backbone and vertebrates are animals that DO have a backbone. Vertebrates are divided by scientists into five classes: fish, amphibians, reptiles, birds, and mammals.

Vertebrates Study Guide Answers - atcloud.com

Vertebrates: Vertebrates are animals which possess a backbone. In the Earth, there are five kingdoms of vertebrates. These are the reptiles, the amphibians, the fish, the birds and the mammals.
