The costs and challenges associated with construction defect claims are significant, making it essential for contractors to proactively manage the potential for financial and reputational risk associated with these types of claims. In this white paper, Travelers covers a number of areas to be aware of, including:

Construction defect pitfalls - Travelers

Construction defects can result from deficiencies in the product itself, how something is designed, installed, operated or maintained. Damages might be seen immediately (such as a burst water pipe), or appear over time (such as a slowly shifting foundation). When allegations of construction defect are presented, understanding each of these potential failure mechanisms (design, installation, products and operation/maintenance) can help to identify potential culpable parties.

Types of Construction Defects | Travelers Insurance

The way that state courts interpret statutes and the types of injuries or claims you're dealing with all affect the rules for pursuing a construction defect claim. And of course, the laws are always changing to either strengthen protections for project owners, or limit the liability of construction professionals.
