Evidence-based practice (EBP) is an approach to care that integrates the best available research evidence with clinical expertise and patient values. 1 It involves translating evidence into practice, also known as knowledge translation, and ensuring that 'stakeholders (health practitioners, patients, family and carers) are aware of and use ...

Implementing evidence-based practice - health.vic

Initially, in 2008, classes on the drug information center, information search strategies, and evidence-based medicine were given to students in the computer laboratory of the faculty of pharmacy, during the first week of the pharmacy internship. In 2009, this approach was modified to enhance the learning process.

A Drug Information Center Module to Train Pharmacy ...

Harm reduction challenges international and national laws, and policies that contribute to drug-related harms. Offer alternatives to approaches that seek to prevent or end drug use - Access to high quality, evidence-based prevention, care and treatment programs, including approaches that involve cessation of drug use, are important for some ...

What is harm reduction? | Harm Reduction International

Separation of the `social' and the `scientific' in treatment is a much-used but conceptually limited distinction. Two alternatives to evidence-based policy are proposed. The first, values-based policy, is increasingly important to critical discussions of social policy and could potentially add much to debates around drug treatment policy.

Evidence, values and drug treatment policy - Kylie ...

The entire drug safety enterprise has a need to search, retrieve, evaluate, and synthesize scientific evidence more efficiently. This discovery and synthesis process would be greatly accelerated through access to a common framework that brings all relevant information sources together within a standardized structure. This presents an opportunity to establish an open-source community effort to ...
