Jenkins Pipeline (or simply "Pipeline") is a suite of plugins that supports implementing and integrating continuous delivery pipelines into Jenkins. A continuous delivery pipeline is an automated expression of your process for getting software from version control right through to your users and customers.

Continuous Integration with Jenkins

Continuous Integration The Jenkins project runs its own Jenkins instance for CI builds on ci.jenkins.io. It will build all plugin repositories in the jenkinsciorganization that have a Jenkinsfilein the root of the repository. The typical plugin build (Maven or Gradle) can be run by just having the following statement in the Jenkinsfile:

Continuous Integration

Continuous integration is a process in which all development work is integrated as early as possible. The resulting artifacts are automatically created and tested. This process allows to identify errors in an early stage of the project. The Jenkins build server is a tool to provide this functionality.
