### Heat Mass

This complex of transport processes is usually referred to as convection. Thus the essential feature of a convective heat-transfer or a convective mass-transfer process is the transport of energy or mass to or from a surface by both molecular conduction processes and gross fluid movement.

Transfer Key  
Solution Manual

Mass Transfer. Aims to encourage the use of a numerically based, computational approach to solving convective heat and mass transfer problems, in addition to classical problem-solving approaches. This text also presents a theoretical basis for the subject of convective heat and mass transfer by focusing on boundary layer theory.
