Current Procedural Terminology - Posterior colporrhaphy ...

This is true for the sutures and labral tape as well. Code 29806 would cover anterior and posterior but modifier -22 may or may not be appropriate. I would not use it simply because the work was performed in both areas. Modifier -22 is reserved for when work is performed "above and beyond" the normal repair which must be clearly documented.

CPT for scope repair shoulder labral tear anterior/posterior

damaged posterior tibial tendon. CPT 27658 (repair, flexor tendon, leg; primary, without graft, each tendon) would be used to repair the posterior tibial tendon (the synovectomy would be included). CPT 27680 (tenolysis, flexor or extensor tendon, leg and/or ankle; single, each tendon) would suffice if a tenolysis alone was done. Walter J Pedowitz, MD Linden, NJ
