Withdrawal of treatment is a common practice in critical care settings, particularly when treatment is considered futile. The case study demonstrates an ethical dilemma, in which Danny is unlikely to make a functional recovery because of multiple organ dysfunction syndromes.

Who decides in withdrawal of treatment in a critical care ...

Because of this difficulty, there is sometimes a lack of consistency and objectivity in the initiation, continuation and withdrawal of life-supporting treatment in a critical care setting. 30 Traditionally, a paternalistic approach to decision making has dominated, but this stance continues to be challenged as greater recognition is given to the personal autonomy of individual patients. 9

Ethical Issues in Critical Care | Clinical Gate

An integral part of the ethics of critical care is the process used for decisions about who needs treatment in the ICU, and when that treatment is no longer indicated. Treatment might be judged to be not indicated because patients are not sick enough for care in the ICU, or because they are too sick and such care is unlikely to provide benefit.

Ethics and end-of-life care for adults in the intensive ...

ethical guidelines for critical care give ambiguous advice, largely because they focus on the moral equivalence of withdrawing and withholding care without confronting the very real differences regarding who is aware and informed of intervention options and how patient values are communicated and enacted. In

Withholding and withdrawing life support in critical care ...

Treatment withdrawal in critical care is associated with ethical issues that can make the process challenging. Good communication with all involved medical disciplines, families, and, where possible, patients is paramount. An individualized approach to patients is required to provide the best possible care for patients.
