This engine replaced the Small Cam 855 series engines and it features a greater camshaft diameter and the introduction of top-stop injectors. Visual differences
The major visual difference between small and big cam engines is that the cam boxes on the side of the engine were made much larger in big cam engines.

Cummins Big Cam engine history with CPL notes

Introduced as the M11 in 1994, it was built on the previous L10 engine (same 4.921 inches (125.0 mm) cylinder bore, but a longer 5.787 inches (147.0 mm) piston stroke compared to the L10's 5.354 inches (136.0 mm) stroke).

Cummins Heavy Duty Engine Manuals & Parts Catalogs

I am correct in thinking that the NTA-
prefix means that the engine is
aftercooled? The NTC- has a centrifugal
water pump? Are all BC2's NTC300's? Is
the "350 cummins" the BC3 NTC350?
What about the NTA855? I saw it rated
at as much as 525 hp. What are the
specs and ratings of these various Big
Cams and what is their maximum
hp/torque? Thanks, Erich
