How To Get A Finance Job From An Engineering Background

If you want to succeed in finance, you need to know economics well. Economics is more about finding the equilibrium point of demand & supply, understanding average cost and marginal cost, finding differences between fixed cost & variable cost and many such theoretical concepts; finance, on the other hand, is the right extension of these concepts. Thus, it's often been seen that people who have made their mark in finance have often had an economics background.

Finance vs Economics - Which Profession is Better?

Apart from the conventional work, now engineers are expected not only to create novel technological solutions but also to make skilful financial analysis of the effects of implementation.
