But to establish the meaning and truth of mathematics is precisely the aim of 'foundations'.] The classical sceptical argument is based on the infinite regress. One can try to pin down the meaning of a term either by defining it in other terms - this leads to infinite regress - or by defining it in 'perfectly well-known terms'.

The transition from school mathematics to university mathematics is seldom straightforward. Students are faced with a disconnect between the algorithmic and informal attitude to mathematics at school, versus a new emphasis on proof, based on logic, and a more abstract development of general concepts, based on set theory.
