## Globalization And Workers Participation In

The process of globalization refers to the merging of national economies on an international level. This has resulted in a change of the labor culture in countries. The positive effects of globalization on workers can be observed through increased standards of living in countries. Additionally, workers from specific areas can travel and pursue better employment in other countries.

Trends in women’s employment Globalization has coincided with a global increase in female labour force participation rates which has narrowed the gender gap from 32 to 26 percentage points. A number of factors associated with globalization processes have contributed to this increase, including the growth of production for export in the developing world.

## **Gendered Impacts of Globalization (Overview)**

When someone talks about human resources and globalization, they're talking about applying human resource techniques to global business practices. This could mean adding workers from other countries and cultures to a business's main headquarters as well as opening new locations or releasing new products in other countries.

Participation in the Economy The International Monetary Fund and the World Bank encourage developing countries to use export-led growth to expand their economies. Such globalized economies require a labor force of a size that must include women, but women's employment varies greatly by region.

## **Women and Globalization**

There is a fourth feature of globalization, one which is not often discussed under the umbrella of globalization, and that is the movement of labour across countries. Here, the reference is with some form of temporary or circular migration where the workers have, in a sense, multiple households in both destination and source countries.
