Health Communication in the New Media Landscape demonstrates the extent to which modern, digital technology can serve as the most practical and efficient form of distributing health-related information. The authors are confident that, if implemented wisely, technology can and will transform the face of health communication as we know it.

Health Communication In the New Media Landscape ...
Public health campaigners are increasingly focussing on models of media engagement due to the considerable and growing amount of evidence that media campaigns can change population health behaviours. New forms of media (that is not just the 'traditional' press and television) can be used to reach large audiences quickly and relatively cheaply with and with repeated exposure to desirable public health messages.
