A Tempus Fugit Grandfather clock is made like any other Grandfather clock, only they were made in Asia, and not in America or Germany. The mechanisms within the clock are the same, for they have a pendulum, chimes, face, hands and inner mechanisms that work in synchronized order within the clock allowing it to function properly.

How to Fix a Tempus Fugit Grandfather Clock | Our Pastimes

In 1926, the Revere Clock Company was set up to manufacture electrically driven clocks, including both mantle and floor models. In 1929 sales reached their all time high of \$1,200,000 but by the time of the stock market crash in October of that same year sales had fallen to \$242,000.

Herschede Clock Repair and Restoration

Quartz versus mechanical grandfather clocks. Both of these types of clocks were common in the 1970s and later decades. The type of vintage grandfather clock you select is simply a matter of personal preference. Some clock enthusiasts love mechanical clocks because they are fun to work with and you get to wind them regularly.
