can you solve it? For instance, only rank the imports of Apple as below screenshot shown. In this article, I will talk about the method to quickly handle it in Excel. Rank data based on a specific value

## **How to quickly rank a list by a specific value in Excel?**

## Download File PDF How To Rank And Value Fantasy

You can use the RANK function to rank numeric values. RANK has two modes of operation: ranking values where the largest value is #1 (order = 0), and ranking values where the lowest value is #1 (order = 1). In this case, we are ranking test scores, so the highest value should rank #1, so we omit the order argument, which defaults to zero:
