HSV-1 is a common cause of ocular infections worldwide and a significant cause of preventable blindness. Corneal scarring and blindness are consequences of the immune response induced by repeated reactivation events. Therefore, HSV-1 therapeutic approaches should focus on preventing latency and reactivation.

Severe acute respiratory syndrome (SARS) is caused by a newly discovered coronavirus (SARS-CoV). No effective prophylactic or post-exposure therapy is currently available. We report, however, that chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug either before or after exposure to the ...

Abstract. The purpose of this review was to summarize the epidemiology, clinical pictures, and virology of enterovirus 71 (EV71) infection. An epidemiological study in Taiwan revealed that the reported incidence of mild cases of hand-footmouth disease/herpangina (HFMD/HA) varied from year to year; seasonal variations in incidence were observed, with an incidence peak observed during the summer ...
