### **Liquefied Natural Gas (LNG) Market Insights, Current And ...**

Liquefied natural gas (LNG) is natural gas (predominantly methane, CH<sub>4</sub>, with some mixture of ethane, C<sub>2</sub>H<sub>6</sub>) that has been cooled down to liquid form for ease and safety of non-pressurized storage or transport. It takes up about 1/600th the volume of natural gas in the gaseous state (at standard conditions for temperature and pressure).

## **Liquefied Natural Gas (LNG) Workshop #1 - Production ...**

Liquefaction enables natural gas that would otherwise be “stranded” to reach major markets. Developing countries with plentiful natural gas resources are particularly interested in monetizing natural gas by exporting it as LNG. Conversely, more developed nations with little or no domestic natural gas rely on imports.

### **Liquefied Natural Gas - Energy.gov**

DNVGL-RP-G105 Development and operation of liquefied natural gas bunkering facilities. The objective of this recommended practice (RP) is to establish the guidelines required to protect the safety of people, property and the environment when developing and operating LNG bunker facilities. Furthermore, this document is intended to increase the overall understanding of the risks associated with LNG bunkering and demonstrate how to best manage
