Machined Mortise and Tenon Joints - Following the mid 1800's, carpenters were able to use hand tools that stripped or tore away the excess wood. This made even hand crafted pieces much easier to produce, and allowed production to go from single digits a day to double digits.

Antique Joints and Joinery Techniques - Antique HQ

Once design drawings have been approved by all parties, our joinery shop team crafts the timber frame package through the combination of the use of a state-of-the-art CNC machine (CNC stands for Computer Numeric Control) and hand cutting the timbers. The machine we have used since 1997 is known as a Hundegger K1.

Woodworking Machinery UK - Industrial & Joinery Machines

This article originally appeared in the February 2014 issue of Popular Woodworking Magazine as "4 Way to Make a Mortise." by Robert W. Lang pages 44-48. The mortise-and-tenon joint is fundamental in woodworking. Along with the dovetail, this joint has been used for thousands of years. If you judge by the number of devices and methods developed to avoid making mortises, you might think it ...

The Best Mortise and Tenon Tools for Your Project ...

If you want the best possible joint-smoking experience you can get — be it from a machine-rolled jay or hand-rolled jay — it's all about what you put inside. That's why we always recommend rolling your joints with a high-quality, sustainably sourced, organically grown cannabis bud like those from Honest Marijuana .

Joint-Rolling Machine Vs. Hand Rolling: Which Is Better ...

One of the versatile joints, the mortise and tenon joint lends itself to being cut with hand tools, power tools, or combinations of the two. There's also seemingly no end of commercial and shopmade jigs that make it easier to cut mortises, tenons, or both. We've compiled 10 of our favorite articles from authors like

10 Ways to Cut a Mortise and Tenon Joint - FineWoodworking

Students will learn to approach the subject from combined machine and hand tool understanding how to use marking gauges, how to layout joinery and how to cut and fit joinery. Courses start at \$600 - Groups of two students - moderate experience is good but no tools are needed.

Learn the Techniques of Cutting Joinery by Hand Using Hand ...

The most powerful tool in our timber-framing shop is a Hundegger K2i, a CNC multihead machine

that cuts the timbers to length and does the majority of the joinery. After our team designs the joinery and tells the machine how to make the cuts, we can put a timber in one end and a nearly complete piece of the frame comes out the other.
