Lower flaps on schedule. Watch the speed tape in the PFD. As soon as a flap setting indicator passes the current speed marker, lower flaps to the next flap setting. For instance, when UP passes the speed marker, lower flaps to 1. When 1 passes, lower flaps to 5, and so forth until your flaps are at 25. Lower the landing gear.

Krueger flaps, or Krüger flaps, are lift enhancement devices that may be fitted to the leading edge of an aircraft wing.Unlike slats or droop flaps, the main wing upper surface and its nose is not changed.Instead, a portion of the lower wing is rotated out in front of the main wing leading edge. Current Boeing aircraft, and many others, use this design between the fuselage and closest engine ...
