Server Analysis  
Services By  
George Spafford  
2001-08-10

Let us begin by acknowledging that MDX is a nontrivial topic. With SQL Server 2000 and Analysis Services, Microsoft is providing arguably the most powerful OLAP solution at perhaps the lowest price. But with power comes complexity. Much of this complexity is to be found in the OLAP query language: MDX.

The SQL query language is used to access data in most simple databases. But for multidimensional (or OLAP) data warehouses, Microsoft developed MDX. The MDX query language has become essential know-how for developers and users alike, whether for data warehouses or for budgeting and planning systems.

The MultiDimensional eXpressions (MDX) language provides a specialized syntax for querying and manipulating the multidimensional data stored in OLAP cubes. While it is possible to translate some of these into traditional SQL, it would frequently require the synthesis of clumsy SQL expressions even for very simple MDX expressions.
