Physicians were trained in the art of diagnosis—often shown in manuscripts holding a urine flask up for inspection (54.1.2, Hours of Jeanne d'Evreux, marginal illustration, fol. 143), or feeling a pulse. In fact, in the sixth century, Cassiodorus wrote that “for a skilled physician the pulsing of the veins reveals [to his fingers] the patient’s ailment just as the appearance of urine indicates it to his eyes.”

Medieval medicine in Western Europe was composed of a mixture of existing ideas from antiquity. In the Early Middle Ages, following the fall of the Western Roman Empire, standard medical knowledge was based chiefly upon surviving Greek and Roman texts, preserved in monasteries and elsewhere. Medieval medicine is widely misunderstood, thought of as a uniform attitude composed of placing hopes in the church and God to heal all sicknesses, while sickness itself exists as a product of destiny ...

Most medieval ideas about medicine were based on those of the ancient work, namely the work of Greek physicians Galen (129–216 CE) and Hippocrates (460–370 BCE). Their ideas set out a theory of the human body relating to the four elements (earth, air, fire and water) and to four bodily humours (blood, phlegm, yellow bile and black bile).
