Portal hypertension refers to an increase in blood pressure inside the portal vein that occurs due to liver damage. In this article, we discuss the symptoms and causes of portal hypertension.

Portal hypertension: Symptoms, causes, and treatment

Portal hypertension is an increase in the pressure within the portal vein, which carries blood from the digestive organs to the liver. The most common cause is cirrhosis of the liver, but thrombosis (clotting) might also be the cause.

Portal Hypertension

The portal vein carries blood from your stomach, pancreas, and other digestive organs to your liver. Portal hypertension can be quite serious, though it's treatable if diagnosed in time. Learn ...

The clinical consequences of PH, which include the development of multiple acquired portosystemic shunts (MAPSS), ascites, hepatic encephalopathy (HE), or some combination of these, cause significant morbidity and mortality. 1-3 Reviews of PH appeared in the veterinary ...

Portal Hypertension: Pathophysiology, Diagnosis, and Treatment

Portal hypertension is caused most often by cirrhosis (in developed countries), schistosomiasis (in endemic areas), or hepatic vascular abnormalities. Complications can include acute variceal bleeding (with a high mortality rate), ascites, splenomegaly, and portosystemic encephalopathy. Diagnose portal hypertension based on clinical findings.

Portal hypertension is elevated pressure in your portal venous system. The portal vein is a major vein that leads to the liver. The most common cause of portal hypertension is cirrhosis (scarring) of the liver. If you have an advanced liver disease, such as cirrhosis, you have an increased risk of ...

Portal Hypertension

Portal hypertension may be defined as pressure in the portal venous bed that exceeds 5 to 8 cm H₂O or a pressure gradient of more than 5 cm H₂O between the hepatic veins and the portal circulation. When the pressure in the portal circulation exceeds those values, a series of physiologic changes leads to the symptoms common to all forms of ...
