Program

Resource utilization in project management focuses on how much time team members spend on various tasks. While there are multiple ways to measure resource utilization, the simplest and most common method is by taking the actual number of hours worked by a resource, and dividing it by the total number of hours that the resource could have worked. For example, if over a six-month period a resource worked for 840 hours and there were 960 hours of work available, then the resource utilization is .

Best Practices for Resource Utilization in Project ...

The employee utilization rate is one of a handful of key performance indicators (KPIs) used by A&E firms to measure the ability of the firm to keep employees working on billable projects. Your employees are your firm's primary asset and optimizing their performance and use of their time will make the difference between low or high project profit margins.

Improve Employee Utilization and Productivity

For example, it might be for a given business that 60% billable utilization is profit-making and below is loss making, 60-65% is okay, 65-70% is excellent and 70% is frankly too high and you need to investigate why (there could be valid reason like end of a project).

How to Measure and Improve Billable Utilization with ...

Remember that "utilization" is akin to "busyness." It is not a synonym for effort. So recommending 80% utilization does not mean that project teams should give 80% effort and then head out early at 3 p.m. The recommendation is that businesses plan their queue to keep teams 80% occupied (it's a top-down and

bottom-up effort).

5-Step Action Plan for Optimal Resource Utilization at SMBs

A Project Resource Utilization-Realization Report is available to monitor utilization and realization results. The report prompts for the standard hours available to the resource allowing the time to be monitored on a daily, weekly, monthly, or any defined time period allowing quick and easy access to how the resource team is performing individually, as well as, collectively.

How to Calculate Resource Utilization and Realization Rates

To improve employee utilization in both the short term and long term, focus on these four key areas: Realistic Utilization Target: Firms that set realistic employee utilization targets tend to have higher morale as the goals for target utilization are viewed as attainable by their staff. These realistic targets allow for staff to focus on other, non-production (yet still important) initiatives for the firm, such as business development, staff development, and team building.

4 Ways to Improve Employee Utilization

Proactively reallocating released blocks to needy surgeons increases utilization. So if a surgeon does not have cases scheduled for the upcoming week, remind them to release the block and assign it to a surgeon that could use it, rather than letting the block go abandoned (and unutilized).
