If you want firmer damping you could replace the fork oil with heavier weight oil. But to get onto the subject of emulators, I believe the DR can use some cartridge emulators yes. I have Wirth springs in my bike, 10 weight oil and a 160 mm air chamber. Though the bike feels softly damped on tarmac and in the soft stuff, it feels too stiff on rocks.

DR650 Fork oil level question... | Adventure Rider

seems like my ktm dirt bikes take just barely more than a half quart of oil per fork, so i have to get 2 bottles and try not to lose one before the next time i change oil.. what about the dr650? what is the approximate oil capacity? will i need 2 quarts of oil to change the oil in both legs? also, are folks happy with the stock 10w with heavier springs? or do ya like something heavier, like ...

dr650 fork oil. quantity and weight? - DR - ThumperTalk

oil level is set to the specified level by removing fork springs and allowing forks to gently bottom out, maximum travel. typically you would overfill the forks and draw out the excess oil with a syringe/tube that is set a specific distance below the edge of the top of the fork tube, in roadracing you will see a lot of bikes running between 90 ...

2004 Suzuki Katana 600 fork oil capacity - Fixya

The industry loved these forks. They received rave reviews from all the magazines and became especially popular with the off-road crowd. I never owned one of the RM's that came with these forks, but I rode many RM's of those year models and was always blown away on how much better their forks were than even many of the seriously re-valved and modded forks of the time.
