Vehicle Rescue and Extrication: Principles and Practice ...

Rescue and Extrication. Car safety has traditionally looked at crash protection - how well a vehicle protects its occupants during an impact by means of crumple zones, restraint systems and airbags, for example. More recently, and with the advent of advanced driver assistance technologies, crash avoidance has become a very important part of safety, with systems helping the driver to stay in lane, to maintain the appropriate speed and even to intervene and brake if the driver has not done ...
