Analog tape and LPs aren't perfect, we like them for their sound as it is, making them technically better doesn't always make them sound subjectively better. Playing a record uses a stylus tracking...

### Why do LPs sound so good?

Also, many music lovers just prefer the sound of a vinyl record. They argue that, despite the occasional extraneous noises on a record from dust or a scratch, vinyl has a deeper, richer sound than a digital version, which can feel too perfect. They also enjoy other aspects of records, such as liner notes, photos, posters and other album extras.

### About Us - The Analog Vault

Note: Vinyl records are often mastered with better dynamics – thanks in part to the inherent limitations of the analogue format. If you prefer the sound of your vinyl for this reason, but love the convenience of digital – it's worth considering a high quality pre-amp such as the Radial J-33 combined with a high-quality audio-interface for archiving records to your computer.

### How to Digitize Your Vinyl Records - Sound Matters

The best-sounding vinyl reissues originate with the original analog master tape, from which a lacquer (an aluminum disc-shaped base plate coated with about 20 millimeters of soft lacquer) is cut and—after several production processes—becomes the mother stamper that presses your record.
