...

A Savonius is a type of vertical axis wind turbine (VAWT) generator invented in 1922 by Sigurd Johannes Savonius from Finland though similar wind turbine designs had been attempted in previous centuries. The Savonius is a drag-type VAWT which operates in the same way as a cup anemometer (pictured below).

Reviewed (2020 Guide)

The Savonius turbine is one of the simplest turbines. Aerodynamically, it is a drag-type device, consisting of two or three scoops. Looking down on the rotor from above, a two-scoop machine would look like an "S" shape in cross section. Because of the curvature, the scoops experience less drag when

File Type PDF Wind Generator Savonius Type 12v 200 Watt

moving against the wind than when moving with the wind.

Savonius wind turbine - Wikipedia

The savonius wind turbines can be grouped close together without any loss on efficiency. So it's possible to have a concentrated array in a small area without any loss of performance.

File Type PDF Wind Generator Savonius Type 12v 200 Watt

Standard wind turbines can create turbulence which can impact the performance of other windmills around it.
