occur or collocate regularly with certain other words. — Morton Benson.

Co-occur | Definition of Co-occur by Merriam-Webster

Word embedding is the collective name for a set of language modeling and feature learning techniques in natural language processing (NLP) where words or phrases from the vocabulary are mapped to vectors of real numbers. Conceptually it involves a mathematical embedding from a space with many dimensions per word to a continuous vector space with a much lower dimension.

Word embedding - Wikipedia

First, co-occurrence frequencies are typically counted as the number of sentences or documents in which both of two target words appear. Second, a context word information method entails that a feature vector for each word is algorithmically estimated.
